

## Call for Participation

# ICAA 2018 Workshop on AI for Future Health Town

**Time: 28 July 2018 14:00 - 17:30**

**Venue: Nanyang Executive Centre, Nanyang Technological University, Singapore**

The 2018 International Conference on Ageless Aging (ICAA 2018) will be held in Nanyang Technological University (NTU), Singapore, 28-31 July. ICAA 2018 (URL: <http://icaa2018.crowdsience.org/>) will focus on the technical solutions to the problems pervasively found in large cities such as smog pollution, traffic congestion, garbage siege, population expansion, medical facilities, drinking water shortage, and other major urban diseases that affect people's health. Moreover, we recently observe a rapidly emerging trend of micro-cities across the world (15-minute life circle, achieving balanced development of family, work and health) and learn some successful experiences in community planning, design and management in Singapore. In the historical moment of China's urbanization transformation, the conference organizers propose the "AI for Future Health Town" workshop. We sincerely invite planners, designers, builders and managers of "smart cities" and "featured towns" across the globe to join together in this workshop, guiding and promoting the development and improvement of China's AI-centric future health towns.

### **International Advisory Committees**

Chin Jing Jih, Nanyang Technological University, Singapore

Thomas W. Calvert, Simon Fraser University, Canada

Rabab Ward, The University of British Columbia, Canada

Victor Lesser, University of Massachusetts Amherst, USA

Yueting Chai, Tsinghua University, China

Xiaoming Li, Peking University, China

Ah-Hwee Tan, Nanyang Technological University, Singapore

Martin McKeown, The University of British Columbia, Canada

Yiqiang Chen, Chinese Academy of Sciences, China

Cuntai Guan, Nanyang Technological University, Singapore

### **General Co-Chairs**

Chunyan Miao, Nanyang Technological University, Singapore

Cyril Leung, The University of British Columbia, Canada
